STAT

We have carefully reviewed reference A and appreciate the fact that you have requirements that were not included in the original design of your space. However, in view of reference B request to move your Collection Group (CG) out of your space in the New Headquarters Building (NHB), we believe the space currently allocated to you will be sufficient to incorporate reference A requirements. We realize that some redesign of the space may be required. In this regard, the Facilities Management Division (FMD), OL, will be in contact with you to review your total requirements to determine what, if any, modifications will be made to your space in the NHB. If modifications are required, they will be accomplished after Government acceptance of the NHB.
